Subject: FW: WY Regional Haze 309g Plan - Proposed Action

We have sent the WY DEQ a copy of the regional haze proposed action and have confirmed that they have received it. We plan to send copies of the proposed action to other parties (env groups and industry) that have requested it at 2pm mountain (the other notifications listed in the comm strat can occur then). It should also be posted to our web site late today or tomorrow.

Steve

Here is the pre-publication copy of EPA's proposed action on Wyoming's regional haze 309g plan. The proposal should publish in the FR in a week or so, which will start the 60 day comment period.

I'll give you a call shortly.

Thanks

Carl Daly
